

# Printing the project

In «**Print**» mode you can form the unfolding of the project, add snapshots of the project made from different angles, specify materials and their amount, specify tiles trimm.

## Edit plan

By default, the print project - plan - includes five projections of the project with indication of the room size:

There is a «toolbar» On the Left side, just as in other modes:

By clicking on the «+» «Unfold» menu will show up.

Adding a table showing the materials and their quantities.

Print project may comprise several sheets.

To add another list, press on the «+» next to the thumbnail «Sheet №»:

You can specify paper orientation, map projections, «photos», Table materials, display sizes, on each sheet separately.

## Toolbar Interface

### Printing to a file

**Print to file** – here you can save your print project in .jpg format at a user specified location.

The function can be used to print your project from another computer, that doesn't have Ceramic Web software installed, but has a connected printer.

Adding an Image in the print project is similar to adding other objects.

### Print

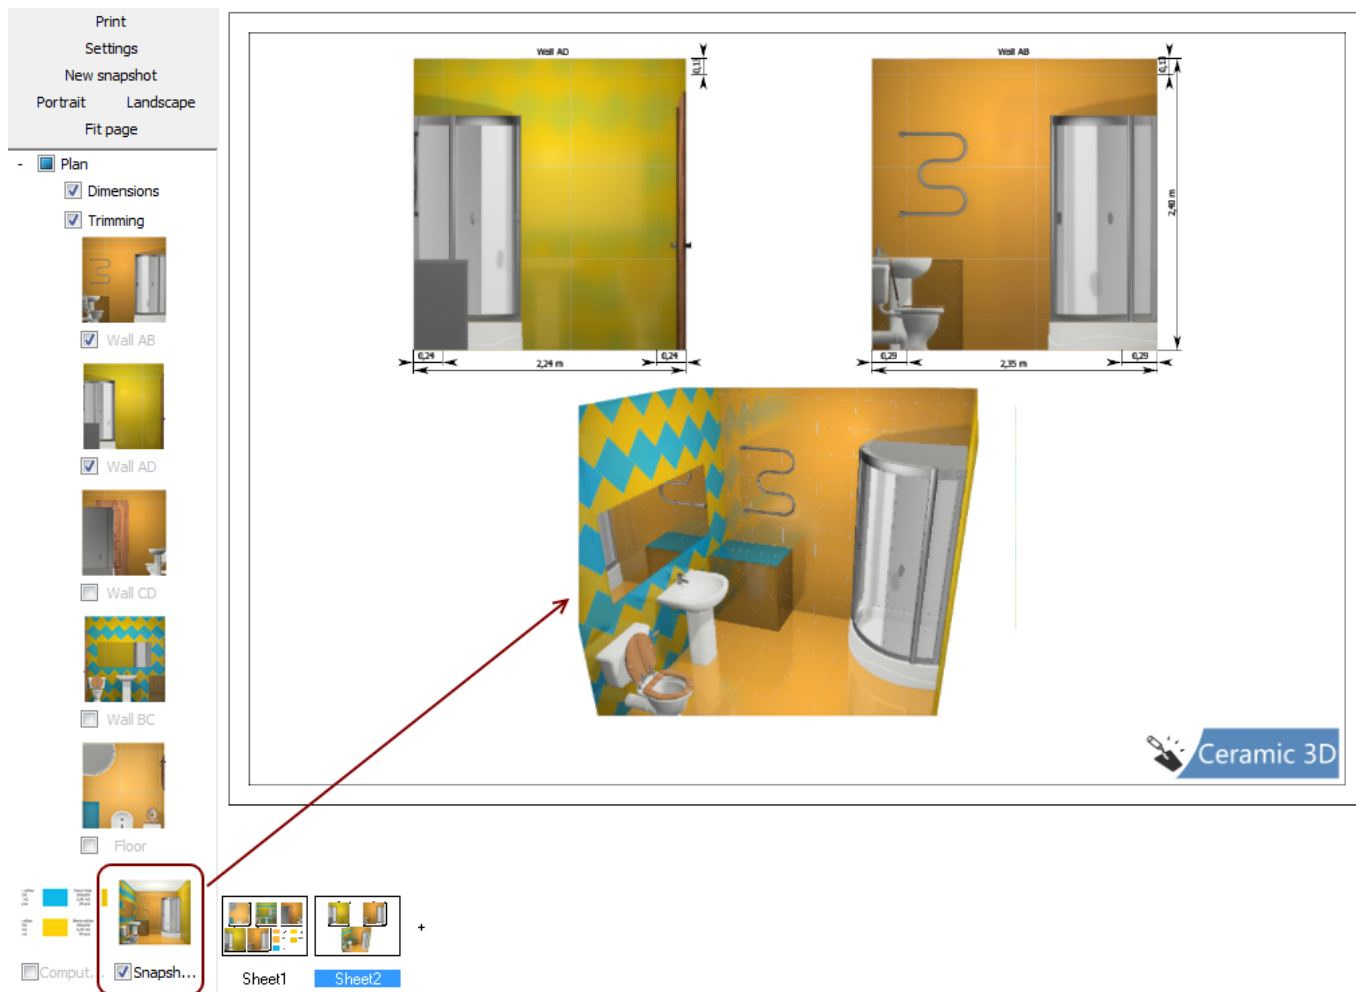

Program uses the printer specified by default to print all the sheets. If there is no printer installed by default, program saves print project to a file (see. above).

### Settings

Button «**Settings**» - similar to the function «Print». Only difference is in the possibility of pre-selecting the printer and changing printer's setup functions by pressing on the «Properties ...».

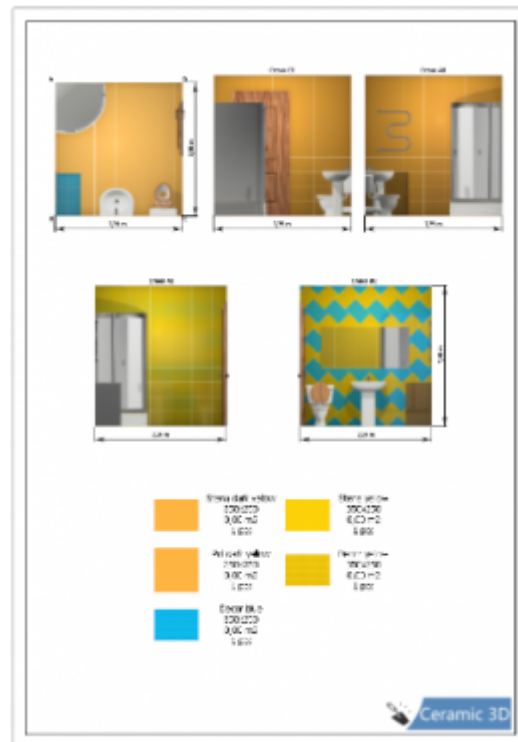

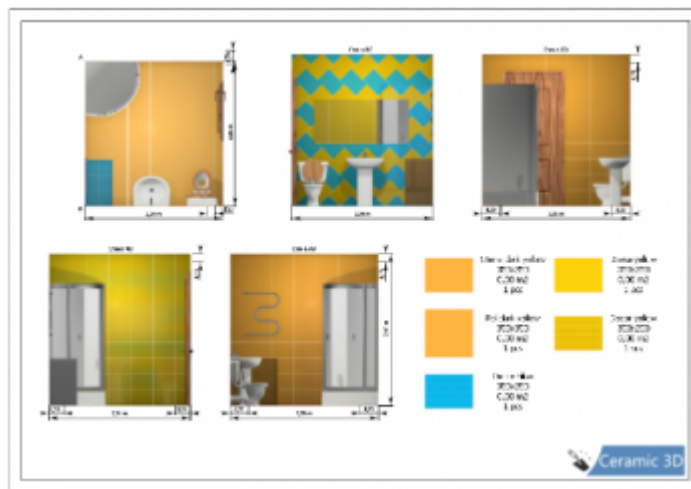

## New Snapshot

**New Snapshot** - shows images of the project in the Toolbar that were made earlier.

## Paper orientation

By clicking on the buttons «Portrait» or «Landscape» you can change the orientation of the paper:
